EXPERIENCE

Go Digital Technology **Prabhadevi, Mumbai**
Associate Engineer *feb 2025 – Currently*

- Built a robust **authorization system** using **FastAPI** and **SuperTokens**, integrating secure access controls across the application.
- Developed responsive, dynamic UI features for stock market modules using **Angular**, **Tailwind CSS**, **PrimeNG**, and **Angular Material**.
- Conducted extensive **testing** of the authorization flow, to ensure system stability, security, and reliability.

Go Digital Technology **Prabhadevi, Mumbai**
Full Stack Developer Intern *Dec 2024 – Feb 2025*

- Learned and developed Full-stack applications using Spring Boot, Angular, .NET Web API, SQL, and JavaScript.
- Designed and optimized RESTful APIs and database schemas to improve application performance and scalability.
- Worked in an agile environment, debugging, testing, and enhancing web applications while collaborating with cross-functional teams.

Freelancer **Mumbai**
Ui Designer & WordPress Developer *July 2024 – Nov 2024*

- Designed and developed responsive WordPress websites, customizing themes and plugins to enhance user experience.
- Collaborated with clients to create UI/UX designs, ensuring visually appealing and user-friendly interfaces.
- Learned and applied web development concepts, including HTML, CSS, and JavaScript, React while working on freelance projects.

On My Own Technology **Oshiwara, Mumbai**
Robotics Associate *July 2023 – July 2024*

- Developed interactive user interfaces, leveraging HTML, CSS, JavaScript, Material UI, Tailwind CSS, to create interactive user interfaces.
- Utilized Python libraries (OpenCV, NumPy, Pandas, Matplotlib) to process image data, conduct in-depth data analysis, and create insightful visualizations.
- Designed and developed API's, frontend interfaces, and server-side logic for numerous projects using MERN stack ensuring robust and scalable solutions.

PROJECTS

MovieVerse: Preview

- A responsive movie discovery and bookmarking platform that allows users to search for movies, view detailed information, and bookmark their favorite films. The application offers a clean and user-friendly interface for seamless navigation and interaction.
- Integrated with the OMDb API to fetch real-time movie data, including titles, posters, release years, and plot details. Users can save and manage bookmarks, and view their personalized movie list.
- **Tech Stack**: React, Material UI, JavaScript, OMDb API, LocalStorage, CSS, Vercel.

Coinrex: Preview

- A responsive cryptocurrency price tracking website that allows users to monitor real-time price movements and trends of various cryptocurrencies. The platform features a clean and modern design for easy navigation.
- Integrated with the Coin Gecko API to fetch real-time cryptocurrency data. Graphs and charts are dynamically generated using Chart.js, offering clear and interactive visual representations of price trends.
- **Tech Stack**: React, Chakra Ui, Chart Js, Axios, framer motion, JavaScript, CSS, Vercel.

Django Full Stack Application Preview

- Developed a comprehensive full-stack web application using Django to facilitate user interaction, artwork sharing, and discovery.
- Deployed the application on PythonAnywhere for accessibility **.**
- **Tech Stack**: Django, Bootstrap 5, PythonAnywhere, HTML/CSS, JavaScript, Font Awesome, Jinja Templates, SQLite.

SKILLS

Programming: Python, Fast Api, Unix, Spring Boot, Angular, .NET Web API, SQL, React, JavaScript, MySQL, Django, Tailwind CSS, Material UI, NumPy, Pandas, Matplotlib, OpenCV.
