SUMMARY

Results-driven Production Support Engineer with 1 year of experience and a Bachelor's degree in Information Technology. Skilled in SQL, Unix, application debugging, and troubleshooting. Experienced in monitoring and maintaining full-stack applications built with Spring Boot, Angular, .NET Web API, and JavaScript. Adept at analyzing and resolving production issues, optimizing database queries, and ensuring system stability. Passionate about enhancing system performance, automating processes, and providing seamless user experiences through efficient support solutions.

EDUCATION

Prahladrai Dalmia Lions College **Malad, Mumbai**
Bachelor of Science in Information Technology | ***CGPA:*** *9.02* *May 2023*

Prahladrai Dalmia Lions College **Malad, Mumbai**
Higher Secondary School | ***Percent:*** *72.71%* *May 2020*

P. J. Pancholia High School **Kandivali, Mumbai**
Secondary School | ***Percent:*** *81.80%* *May 2018*

EXPERIENCE

Go Digital Technology **Prabhadevi, Mumbai**
Associate Engineer *feb 2025 – Currently*

- Architected a secure authorization system using **FastAPI and OAuth**, implementing **role-based access control (RBAC)** and **plan-based page access controls**, restricting feature visibility dynamically based on the user's subscription tier, with end-to-end security enforced across the application layer.
- Built and shipped **10+ responsive UI features and data visualization modules** for a stock market platform using **Angular, Tailwind CSS, PrimeNG, and Angular Material**.
- Integrated **Dhan API login and payment gateway flows**, enabling seamless third-party authentication and transaction processing within the platform.
- Engineered **optimized SQL views and stored procedures** to improve backend data retrieval efficiency for financial data modules.
- Designed and executed **comprehensive QA test plans** covering authorization workflows, edge cases, and security scenarios, ensuring system stability pre-launch

Go Digital Technology **Prabhadevi, Mumbai**
Full Stack Developer Intern *Dec 2024 – Feb 2025*

- Developed and deployed full-stack web applications using **Spring Boot, Angular, SQL, and JavaScript** within an Agile/Scrum development environment.
- Designed and optimized **RESTful API architectures and relational database schemas**, improving application scalability and query performance across multiple modules.
- Built and shipped cross-platform mobile applications using **Ionic**, extending product reach to mobile users.
- Collaborated with cross-functional teams on debugging, **QA testing**, and feature enhancements, contributing to a measurable reduction in post-deployment defects.

Freelancer **Mumbai**
UI/UX Designer & Frontend Developer *July 2024 – Nov 2024*

- Designed and delivered a cross-platform mobile app UI/UX in Figma for a paying client, translating user requirements into polished, user-centric interface designs.
- Expanded full-stack proficiency by independently building projects using **React, Next.js, Tailwind CSS, and Django**, broadening capability across modern frontend and backend ecosystems.

On My Own Technology **Oshiwara, Mumbai**
Robotics Associate & Technical Trainer *July 2023 – July 2024*

- Engineered interactive, responsive user interfaces using **HTML, CSS, JavaScript, Material UI, and Tailwind CSS**, reducing UI development turnaround time across multiple internal projects..
- Processed and analyzed image datasets using **Python (OpenCV, NumPy, Pandas)**, generating actionable visualizations with **Matplotlib** to support data-driven decision-making.
- Designed and delivered a structured technical curriculum covering **Python, OpenCV, TensorFlow, Matplotlib, PyAutoGUI, and OOP principles** to a cohort of **40+ students** over 12 months, reinforcing applied knowledge through hands-on project mentorship.

PROJECTS

MovieVerse: Preview

- A responsive movie discovery and bookmarking platform that allows users to search for movies, view detailed information, and bookmark their favorite films. The application offers a clean and user-friendly interface for seamless navigation and interaction.
- Integrated with the OMDb API to fetch real-time movie data, including titles, posters, release years, and plot details. Users can save and manage bookmarks, and view their personalized movie list.
- **Tech Stack**: React, Material UI, JavaScript, OMDb API, LocalStorage, CSS, Vercel.

Coinrex: Preview

- A responsive cryptocurrency price tracking website that allows users to monitor real-time price movements and trends of various cryptocurrencies. The platform features a clean and modern design for easy navigation.
- Integrated with the Coin Gecko API to fetch real-time cryptocurrency data. Graphs and charts are dynamically generated using Chart.js, offering clear and interactive visual representations of price trends.
- **Tech Stack**: React, Chakra Ui, Chart Js, Axios, framer motion, JavaScript, CSS, Vercel.

Django Full Stack Application Preview

- Developed a comprehensive full-stack web application using Django to facilitate user interaction, artwork sharing, and discovery.
- Deployed the application on PythonAnywhere for accessibility **.**
- **Tech Stack**: Django, Bootstrap 5, PythonAnywhere, HTML/CSS, JavaScript, Font Awesome, Jinja Templates, SQLite.

SKILLS

Languages: Python, JavaScript, SQL, Java
Frameworks & Libraries: FastAPI, Angular, React, Spring Boot, Django, NumPy, Pandas, Matplotlib, OpenCV
UI & Styling: Tailwind CSS, Material UI, PrimeNG, Angular Material
Databases: MySQL, PostgreSQL
Tools & Platforms: Unix/Linux, Git, Power BI, Figma, Postman
Concepts: REST API Design, RBAC, Agile/Scrum, UI/UX Design
